Django.

KANHAIYA KHNASARE

QA TEST ENGINEER

PROFILE

Bringing 3+ Years of hands-on experience in Quality Assurance, I have successfully contributed to the quality of diverse software projects. Dedicated and results-driven Quality Assurance professional with a proven track record in ensuring the delivery of high-quality software products. Proficient in both manual and automated testing methodologies, I bring a keen eye for detail and a commitment to excellence in every phase of the software development life cycle. My experience encompasses robust test planning, execution, and defect tracking, with a focus on identifying and resolving issues to enhance overall product reliability.

EXPERIENCE

Sate Development (QA Test Engineer)   Oct-2021 - Present
- Collaborated with cross-functional teams to develop comprehensive test plans and test cases for web and mobile applications.
- This experience has equipped me with a strong foundation in manual testing methodologies, and a keen analytical mindset.
- Conducted regression testing to identify and resolve issues introduced during development.
- Utilized Jira for defect tracking, reporting, and maintaining detailed documentation.
- Experience in conducting regression tests to ensure the stability of software after changes.
- Identified and categorized gaps in software functionality, performance, and alignment with industry standards.
- Engineering requirements to develop test plans for high-volume production cycles and ensure compliance.

Adnac Business Solutions (Tester)   Sept 2018-Aug 2019
- Executed test plans and test cases for various software applications, providing valuable feedback to improve software quality.
- Collaborated with the development team to reproduce and troubleshoot reported issues, facilitating their resolution.
- Participated in the design and execution of performance testing to assess system scalability and responsiveness.
- Documented and communicated test results, including defect reports, test progress, and overall project status.
